

Customer Assurance

■ Process Certification

Titus and Siemens engineers have processes in place in order to ensure building owners that all Siemens products are compatible with Titus products and have been properly installed on them.

■ Joint Resolution

The true measure of any organization is how they respond when situations don't happen as planned. Titus and Siemens have proactively set in place systems to resolve these issues quickly and seamlessly. Our stated goal is the resolution of any issue with 10 days of our awareness of it.

■ Mutual Pledge

Siemens Building Technologies is a leading, international solutions provider in the security, life safety, building automation and climate controls industry. Titus is the recognized global leader in the air management industry. These two organizations mutually pledge to joint customers complete satisfaction for all Titus products applied with Siemens controls. Should any issue arise related to the application of Siemens controls on Titus products, both organizations will work together at the highest levels to completely remedy the issue within 30 days of notification. Simply contact your local Siemens office or Titus representative, or call one of the numbers listed below.

Titus, the leader in air management, and Siemens, the leading provider of HVAC controls, have joined forces to provide building owners the ultimate in customer service.

VAV Controls

■ FastrakSM

Titus offers certain models of Siemens actuators and controllers on a Fastrak, which means you receive your VAV boxes with mounted controls at no cost or time premium.

■ Fastrak With Download

Models offered on Fastrak can also be ordered with factory downloaded controls applications, offering you cost effective solutions at market speed.

■ Future Innovation

The solutions alliance between Titus and Siemens sets the stage for enhanced controls options for all of your HVAC requirements.

Fan Coil Controls

■ Basic

Electro-mechanical, voltage independent control, 24 to 277 VAC, control features include; temperature setpoint, autochangeover, on/off and 3-speed fan settings for both 2-pipe and 4-pipe fan coils. This control accommodates a 2 position valve.

■ Deluxe

Electronic, LCD indication for 24 VAC control. Features include; temperature setpoint, autochangeover, on/off and 3-speed fan settings, offered for both 2-pipe and 4-pipe fan coils. This control accommodates 2-position, proportional modulating and 3-point floating valves.

■ Premium

Electronic, LCD indication for 24 VAC control. Features include; temperature setpoint, autochangeover, on/off and 3-speed fan settings, offered for both 2-pipe and 4-pipe fan coils. This control accommodates 2-position, proportional modulating and 3-point floating valves.

All controls are compatible with Siemens valves and actuators.

■ Future Innovation

Titus and Siemens will continue to innovate control offerings in order to take advantage of the advances in both fan coil and control technology.
